

## CJC 1295 with DAC

### **Indicators:**

CJC-1295 with DAC is a long-acting growth hormone–releasing hormone (GHRH) analogue that may support sustained growth hormone release, promote muscle development and recovery, assist with fat metabolism, improve sleep quality, and support tissue repair in research settings.

### **Ingredients:**

CJC-1295 with DAC contains CJC-1295 (tetrasubstituted GHRH analogue) with Drug Affinity Complex (DAC) as the active lyophilised peptide ingredient.

### **Key benefits:**

- Improves sleep
- Increase in muscle mass
- Increase immune system
- Improves recovery time
- Improves skin elasticity, reduces wrinkles
- Improves strength in nails and hair
- Increase fat loss
- Increase in metabolic rates and energy
- Anti-aging properties

### **Side effects:**

CJC-1295 with DAC may cause side effects such as headache, flushing, dizziness, nausea, water retention, tingling sensations, increased hunger, changes in blood sugar levels, or mild irritation at the injection site.

**Dosage details:**

You inject 3ml water into the vial of CJC1295 DAC. 1 full syringe is 1ml. You then wait for the vial powder content to dissolve ON ITS OWN. DO NOT SHAKE THE VIAL TO MIX POWDER. Once dissolved and clear in colour you draw out 50 units on the syringe twice a week evenly spaced on the days each morning before breakfast and inject it into the tummy under the skin into the fatty skin layer.

**How long should a vial last?**

A vial should last you 2 weeks
