**Key benefits:**

- Enhances physical performance, stamina, and endurance
- Supports muscle growth, recovery, and prevents muscle loss
- Boosts testosterone and supports fertility
- Strengthens immune function
- Improves learning, memory, and overall brain health
- Supports detoxification (including ammonia removal and metabolic waste clearance)
- Promotes better sleep quality
- Supports collagen production and joint health
- Helps regulate blood sugar and reduce insulin resistance
- Supports gut lining repair and digestive health
- Improves overall metabolism and energy production

**Side effects:**

Epithalon is generally reported as well tolerated in research settings. Mild side effects may include injection site irritation, headache, dizziness, or temporary fatigue.

**Dosage details:**

You inject 3ml water into the vial of Epithalon 50MG. 1 full syringe is 1ml. You then wait for the vial powder content to dissolve ON ITS OWN. DO NOT SHAKE THE VIAL TO MIX POWDER. Once dissolved and clear in colour you draw out 15 units on the syringe each night before bed and inject it into the tummy under the skin into the fatty skin layer.

**How long should a vial last you?**

A vial should last you 20-30 days.
