Side effects:

May cause nausea, and headaches, skin sensitivity.

Dosage details:

You inject 3ml water into the vial of Retatrutide 20/30mg. 1 full syringe is 1ml. You then wait for the vial powder content to dissolve ON ITS OWN. DO NOT SHAKE THE VIAL TO MIX POWDER. Once dissolved and clear in colour you draw out 15 units on the syringe 1 the morning, after a week increase to 20 units, after the second week increase to 25 units and stay on 25 units for the rest of the vial until vial is done. Inject it into the tummy under the skin into the fatty skin layer.

How long should a vial last you?

A vial should last you 8 weeks
